suprema

Contactless mobile solution compatible with iOS and Android

Suprema Mobile Access supports both NFC and BLE(Bluetooth Low Energy) for full compatibility with different types of smartphones.

Prevents unintentional opening **20cm~**

Works only within **10cm**

Works only within **10cm**

Screen does not necessarily have to be ON*

*If the app is running in the background (BLE, Standby mode)

Fast and accurate
Prevents unintentional openings by controlling BLE communication distance, allowing authentication time less than a second

BLE background mode
Works seamlessly without waking up your smartphone

Remote and contactless

Suprema makes it easier to issue and revoke a mobile access card by sending an email to users.

Suprema
Airfob Portal

Suprema
Airfob Pass App

· Saves cost of issuing cards and maintenance in comparison to physical cards
· Protects your data with ISO 27001 certified system architecture
A comprehensive system for mobile access

Using Suprema Airfob Portal, you can build your own fully functional access control system with mobile access.

· Suprema's open API's can easily integrate into your existing system to make mobile access a part of your complete solution
· Suprema's In-App SDK allows you to integrate mobile access card into your own mobile application

Easiest way to go mobile, Airfob Patch

Suprema Airfob Patch is an award-winning, innovative device that attaches to existing RF card readers to make them compatible with Mobile Access Cards.

· Airfob Patch converts Mobile Access Card's Bluetooth signal to RF card signal
· Airfob Patch works without battery, harvesting energy from RF field signals transmitted from the card reader
· A retrofit patch-on device, Airfob Patch is quick and easy to install

Apply to everywhere RF card is used
